The access to the University in the society of knowledge is a necessity.

Incorporation higher education policies are considered central to both the subjective development, including social, economic, scientific and technological of the country. Also to achieve higher levels of sovereignty.

Where there is a need born a right.

Today, those who have no access to higher education are relegated and their opportunities, and thus his freedom, diminished.

The Federal Government invests 1% of GDP in higher education. The University shall provide technical and human capacity to solve common problems.

Excellence for everyone.
The University of Buenos Aires was created on August 12, 1821.

Throughout almost 200 years it has had a structure with 13 faculties, 57 research institutes, five teaching hospitals and one hospital vet school, five middle schools, its own social work for staff and students, 14 museums, a cultural center, a cinema, a radio, a sports field, a publishing house and a tourist residence.

- 20,000 Discharges per year
- 330,000 University Careers
- 20,000 University Postgraduate
- 5,000 High School Students
- 30,000 Teaching positions
- 15,000 No Teaching positions
- 10,000 Researchers and grant holders

Academic Community: 400,000

Excellence for everyone
Universidad de Buenos Aires

Formation
- 95 University Careers
- 400 University Postgraduate
- 5 Secondary School

Investigation
- 10,000 Researchers and grant holders.
- 2,700 Researches
- Own interdisciplinary programs based on specific social issues

Expanse
- Scientific, cultural and social diffusion through direct action
- Teachers, researchers and students implement projects with social impact
- In coordination with civil society organizations

Excellence for everyone
Universidad de Buenos Aires

The knowledge era

All this structure built in 200 years is not enough

We need to create mechanisms to rethink the university, to adapt to the social context and to articulate it with the world

Excellence for everyone

Excellence for everyone
UBA and ICTs

New cultural, economical, social and politic environment → Expansion of information technologies and communications → Ascendent importance on technologies. It changes the way of producing knowledge, it’s communication and teaching

Challenges to integrate the new technologies to the management academic systems and to the teaching practices

We must rethink XXI Century education

Excellence for everyone
Facing these challenges, the University of Buenos Aires has created the “UBA Digital” Program in order to coordinate, integrate and enhance the actions that are being developed in different academic units to integrate ICT in academic management and strengthening the processes of teaching and learning knowledge.
Digital UBA Goals

• Take advantage of technologies for the management and the strengthening of the processes of teaching and learning.

• Advance to the process of inclusion of digital technologies in the academic offer of degree

• Reaching the strategic convergence of actions generated by the faculties and colleges

• Create a digital repository of scientific research that outsource production of the UBA
International Cooperation

Promotes the academic, scientific, and cultural exchanges

Social and cultural integration of the university community with their international peers

Strengthening and consolidation of the network

Participates of Inter-University network actively that seeks to achieve a higher level of cooperation and integration

UBA

Macro universities Net

Excellence for everyone
International Cooperation

Networking latinamerican and the Caribbean Macrouniversities

- A cooperation, exchange and academic consolidation space
- Created at 2002 under UNESCO sponsorship
- Integrated by 34 public universities from 19 countries
- Presided by Buenos Aires University

Academic alliance in the region that drives and increases the conformation of: Latinoamerican Knowledge path

Latin american highways of knowledge

SAN PABLO UNIVERSITY
NATIONAL AUTONOMOUS UNIVERSITY OF MEXICO

Partnership

With the aim of increasing the academic and cultural integration of Latin America under a coordinate strategy

Excellence for everyone
International Cooperation

- Academic cooperation through the Centers Franco - Germano Argentino - Argentine and Asia Pacific
- Creation of the Confucius Institute at the Faculty of Economics (ICUBA)
- University participation in international fairs
- Receiving delegations from foreign universities
- Exchange programs and mobility of university students and graduate students, teachers and researchers in institutions of the region and other countries.
- Management grants and international projects
- Assistance to students, teachers and international scholars

Excellence for everyone
The development of our people depends on genuine knowledge generation and associated with the peculiarities of each region.

Without voiding the cooperation with the North (that is important), South Universities must join forces and draw common paths.

The cooperation must have as shafts including the vast majority, many times excluded from university education, promotion of academic quality, and establishing priorities for the realities of the South.

Coordination of efforts, knowledge and experiences among developing countries is central to strengthen the processes of local growth, in terms of education and research. Until we move forward in the creation of strong policies to promote research and training, and to protect our technical capacity, the sovereignty of our people will be diminished.

The exchanges are very helpful, but we need to increase the production of results based on common needs, providing each its capacity and resources.
Thank you very much
