

Leuven International Doctoral School Biomedical Sciences 18 vacant PhD positions

The mission of the Leuven International Doctoral School Biomedical Sciences is to train young biomedical researchers to explore the fundamentals of living systems at all levels - from gene to cell to body and mind - and to leverage that knowledge to improve human health.

For 2012 we can offer up to **18 fully-funded PhD positions** in the following doctoral school programmes:

Cancer: 2 fellowships

Cell Signaling and Therapeutics: 3 fellowships

Cognitive and Molecular Neurosciences: 5 fellowships

Drug Design and Development: From Target to Market: 1 fellowships

Exercise and Physical Activity in Health and Disease: 2 fellowships

Emerging Concepts in Cardiovascular Medicine: 3 fellowships

Mechanisms of Human Disease: 1 fellowship

Molecular and Developmental Genetics: 1 fellowship

Successful applicants will perform doctoral research under the supervision of a promoter who is affiliated to one of the doctoral school programmes. In addition, the doctoral training includes thematic education and encourages PhD students to develop transferable skills.

PhD students are expected to finalize the doctoral training and research within a period of four years.

Applications are invited from enthusiastic (under)graduates in any relevant biomedical area with an excellent study track record.

Please consult our website for further information on the projects and the application procedure: <http://gbiomed.kuleuven.be/phd> - **International Call.**

Deadline for application is January 31, 2012!
