

FPI fellowship for a PhD tesis

Associated to the Project:

**“Targeting the interaction between the tumor cell and its microenvironment:
a new therapeutic approach for the treatment of Follicular Lymphoma”**

The PI of the financed project belongs to the IDIBAPS group: “Therapeutic targets and regulation of cell death in lymphoid neoplasia” directed by Dr. Dolors Colomer

<http://www.idibaps.org/research/team/303/physiopathology-and-molecular-bases-in-hematology>

Requirements

- Degree in Biology, Biochemistry, Biotechnology, Pharmacy or Medicine
- Be enrolled this year (or have already finished) in a Master related to the field
- Experience in molecular and cellular biology techniques will be highly considered

Candidates should send a cover letter, CV, degree records and, if possible, two reference letters to:

Patricia Pérez-Galán, PhD
