The unitary patent and the unified patent court: Implications, opportunities, doubts, and decisions to be made (II)

ZBM Patents & Trademarks

Barcelona, 27 de febrero de 2023

Montserrat Jané / Noemí Daviu
Some highlights of the UPC

- **International court** common to a number of **EU states** that will allow to attack, defend and enforce patents granted by the European Patent Office (EPO) centrally through a **single court action**
  - Initially will have effect in 17 countries
  - The territorial scope of the UPC decisions will change over time as countries ratify

- System based on a **blend of procedural rules and practices** from different European legal systems

- **Independent** of the European Patent Office (EPO) and the national courts
Some highlights of the UPC

- **European Patent Attorneys** with appropriate qualifications (as well as **lawyers** authorized to practise in a court of a contracting MS) may act as representatives for parties before the UPC.

- Fully electronic court: All documents will be filed through a digital platform (Case Management System, CMS) accessible via smart cards of qualified EU trust service providers.

The **national courts** will remain competent for actions relating to patents and SPCs which do not come within the exclusive competence of the Court.
Proceedings before the UPC

- Mainly written proceedings
  - Front loading system (set out the full case as early as possible)
- The procedure before the Court of First instance will have 3 main phases:
  - written phase
    - exchange of written pleadings between parties
  - interim procedure
    - Judge Rapporteur will explore with the parties the possibility for a settlement, including through mediation, and/or arbitration
  - oral hearing (for an ordinary patent case it will last 1 day)
Proceedings before the UPC

- By default hearings to be held in person
  - But the Court has discretion to allow parties, representatives, experts or witnesses to attend the oral hearing by video conference
- Public proceedings unless the Court decides to make them confidential
- Hearing of a witness likely to be exceptional
- Very quick decisions (12-14 months) of direct application
- Award of damages and decision on costs may follow
Time schedule for a typical infringement or revocation action

Written phase: between 6 and 9 months
UPC Court fees

- Court fees to self-sustain the Court and allow for fair access to justice:
  - **fixed fee** for all actions (infringement, DNI: 11,000 EUR, revocation: 20,000 EUR)
  - **value-based fees** for actions whose value is above 500,000 EUR
  - **value-based fees** increase with the value of the action (maximum of 325,000 EUR for action value higher than 50 Mio EUR)

- Reduction or reimbursement of fees in certain cases

- In general, the **losing party will bear legal costs and other expenses** of the winning party (reasonable and proportionate costs) up to a ceiling

- Guidelines of the Administrative Committee for determination of Court fees and ceiling of recoverable costs of the successful party

- The costs of **legal services** (lawyers, patent attorneys) will be the most significant
The Registry plays a key role

Responsibilities of the Registry:

- Maintain the records of all cases before the Court
- Serve the Statement of claim and all further pleadings upon the parties
- Examine the formal requirements of written pleadings and if needed invite to correct deficiencies
- Keep lists of the pool of judges, patent attorneys entitled to represent parties before the Court, and experts
- Publish notifications and withdrawals of opt-outs and notify the EPO
- Publish Court decisions and annual reports
Appointed UPC judges

- Expected decisions of **quality** (specialized judges with legal or technical background) and **harmonized** (appealable decisions)

- On 19.10.2022 the list of **85 appointed judges** and the composition of its Presidium (responsible for the management of the Court) was announced

---

**Presidium**

- **Klaus Grabinski** (DE, Federal Court of Justice Karlsruhe)
- **Florence Butin** (FR, Paris Court of Appeal)
- **Camille Lignieres** (FR, Paris Regional Court)
- **Ronny Thomas** (DE, Düsseldorf Higher Regional Court)
- **Peter Tochtermann** (DE, Mannheim Regional Court)
- **Rian Kalden** (NL, The Hague Court of Appeal)
  - **Ingeborg Simonsson** (SE, Stockholm City Court)
  - **Alexender Ramsay** (SE, Chairman UPC Preparatory Committee, former judge, Ministry of Justice)

---

**NEWS**

- "Top legal quality"
- "Greatest possible competence at the appeals Court"
- "The quality and experience of the judges is outstanding"
The appointed judges include both legally qualified judges (LQJ) and technically qualified judges (TQJ), with in-house attorneys also included.

In-house attorneys: CSL Behring, Airbus, Bose, 3M, Agva-Gevaert, Lundbeck, Orange, Nokia.

**Appointed UPC judges**

No candidates selected from countries without a local division or without significant patent activities.

**Nationality UPC judges**

- 32% Germany
- 21% France
- 13% Italy
- 8% Netherlands
- 6% Belgium

**TQJ by technical area**

- Mechanical Engineering: 16
- Chemistry: 10
- Pharmaceuticals: 9
- Biotechnology: 8

# Examples of jurisdiction - infringement actions

| Defendant’s domicile in a UPC MS | P is the owner of a UP  
| AI (based in FR) sells potentially infringing products in FR and DE  
| P may file an infringement action (both for FR and DE) either in:  
| FR local division (domicile of defendant, place of infringement) or  
| DE local division (place of infringement) |
|---|---|
| Defendant’s domicile outside the UPC MS | P is the owner of a UP  
| AI (based in CN) sells potentially infringing products in FR and DE  
| P may file an infringement action in:  
| FR or DE local divisions (place of infringement)  
| Central Division (domicile outside the UPC territory) |
| Subsequent infringement actions (same case, same parties) Art. 33(2) UPCA | P is the owner of a UP  
| AI (based in FR) sells potentially infringing products in FR  
| P files an infringement action in FR local division  
| Later AI starts selling the products in IT and DE  
| New infringement actions with respect to IT and DE must be brought before the FR local division  
| Any actions filed in IT or DE will be declared inadmissible |

P: patentee, AI: alleged infringer

</table>
Infringement and validity – combined actions

**Claimant:** patentee  
**Infringement claim**  
**Local/regional Division**  
**Defendant:** alleged infringer  
**Counterclaim for revocation**

**Local/regional Division** may:

- proceed with infringement & counterclaim for revocation (+TQJ)  
  *Unified proceedings before LD/RD*

- refer counterclaim for revocation to Central Division and stay/proceed with infringement  
  *Bifurcation*

- refer counterclaim for revocation & infringement to Central Division (agreement of the parties)  
  *Unified proceedings before CD*

---

If language LD/RD is not the language of grant, parties may have to provide translations if requested.
Infringement and validity – combined actions

- If no counterclaim for revocation is filed: Bifurcation
- If counterclaim for revocation is filed: discretion of LD/RG for Unified proceedings (likely at LD/RD) or bifurcation
  - Central Division must stay revocation pending a decision of LD/RD
  - LD/RG should take into consideration how far the revocation action in the central division was advanced prior to the stay
Infringement and DNI – combined actions

- If the action for infringement is started within 3 months, DNI must be stayed
  - If started outside the 3 month period, CD and LD/RD may agree on the possibility of a stay of one action

- If a counterclaim for revocation is filed, the proprietor will become a party to the revocation proceedings as defendant
Transitional period

- Protocol on provisional application
- 16 June 2023
- Ratification of Germany
- 1 March 2023
- 3 months

Transitional period 7 years (+ 7 years)
2 exceptions to the UPC exclusive jurisdiction
Apply only available to “classic” EP* bundle patents + SPCs based on them

1) Shared jurisdiction with national courts

2) Exclusion of the UPC jurisdiction
Sunrise period
Possibility to request an OPT-OUT

- No changing the rules in the middle of the game
- Forum shopping
- Effect of the OPT-OUT

*UPC participating countries

Ratification of Germany
19.01.2022
1 March 2023
Uncertainties during the transitional regime

Article 83 UPCA – transitional regime:

1. During a transitional period of seven years after the date of entry into force of this Agreement, an action for infringement or for revocation of a European patent or an action for infringement or for declaration of invalidity of a supplementary protection certificate issued for a product protected by a European patent may still be brought before national courts or other competent national authorities.

3. Unless an action has already been brought before the Court, a proprietor of or an applicant for a European patent granted or applied for prior to the end of the transitional period under paragraph 1 and, where applicable, paragraph 5, as well as a holder of a supplementary protection certificate issued for a product protected by a European patent, shall have the possibility to opt out from the exclusive competence of the Court. To this end they shall notify their opt-out to the Registry by the latest one month before expiry of the transitional period. The opt-out shall take effect upon its entry into the register.
Uncertainties during the transitional regime

During the transitional period, when a patent is **opted out or the case is brought before a national court**, does this mean that:

while the UPC is no longer competent in that specific case, the Agreement itself remains applicable (national court would be obliged to apply the provisions of the Agreement)?

In its Interpretative note (Consequences of the application of Article 83 UPCA of 29.01.2014), the Preparatory Committee said that

- the transitional regime aims at allowing parties for a limited period of time to **continue the current practice**, and that therefore, the **Agreement no longer applies** and the national court would have to apply the applicable national law

- The same applies to SPCs
Uncertainties during the transitional regime

- Actions subject to parallel jurisdiction during the transitional period
  - Art. 83(1) UPCA: an action for infringement or for revocation of a European patent or SPC may still be brought before national courts or other competent national authorities.
  - What about other actions, e.g., a declaration of non-infringement?
    - Preparatory Committee: choice of forum for all actions that are normally dealt with by the UPC.

- Exclusion of jurisdiction (opt-out) - Will the opt-out survive the transitional period?
  - Preparatory Committee: removal of the UPC jurisdiction for the whole life of that patent.
Which jurisdiction will apply?

- Shared jurisdiction

Exclusion of the competence of the UPC (opt-out)

- Necessary condition: no action brought before the UPC
  - Sunrise period for requesting opt-out

Claimant: UPC / national courts

- Transitional period

- Opt-out request

- Opt-out withdrawal ("opt-in")
  - Necessary condition: no action brought before a national court

- Patente
  - Claimant: national courts only

- 3rd party
  - After the transitional period

- ZBM PATENTS & TRADEMARKS
Basic features of the opt-out

- Available for EP patents, EP patent applications and SPCs
- Must be filed by the all the actual proprietor(s) (may not be the one(s) identified in the national registers)
  - For SPCs, opt-out must be requested by the holder of the SPC, if different from the proprietor of the patent, together with the proprietor
  - The licensees cannot request the opt-out
- The application to opt out must be made in respect of all of the designated/ granted states (partial opt-out not possible)
- The opt-out is effective from the date of registration, not from the date of request
- If withdrawn, no second opt-out can be requested
Uncertainties about the opt-out (I) - All states

If exclusion of UPC is desired: which parts of the EP have to be opted-out?

- Opt out (or opt-in) must be made in respect of all of the designated/granted contracting member states (Rule 5.1(b) of the Rules of Procedure amended by Administrative Committee (AC) on 08.07.2022)
  - Not limited to UPC contracting MS (or to EU MS)!!
  - AC: “This wording is inconsistent with the indivisibility of the application to opt out. It implies that the UPC solely has jurisdiction over UPCA Contracting Member States, which is not the case”

- What does “granted states” mean?
  - Countries in which the patent has been (automatically) validated?
  - All designated countries at grant (usually all EPC countries), even if the patent has not been validated in these countries?

To be on the safe side, opt out all designated states
Consequences of new Rule 5.1(b) RoP

- The interpretation of Rule 5.1(b) RoP may make the opt out (or opt-in) request very complex.

Example: European patent which has been transferred after grant:
- EP patent validated in 5 EP states (DE, FR, UK, ES, IT) and then transferred to a new owner.

- Who is the proprietor?
  - With respect to validated states: new owner.
  - With respect to all remaining designated states: original proprietor.

- If granted states = all EPC states, consent of the current owner for the 5 validations and of the original proprietor for the EPC states in which the patent was not validated is needed.
Uncertainties about the opt-out (II)- representatives during the sunrise period

During the sunrise period, how should the opt-outs by EPAs with appropriate qualifications be filed?

- Opt-out request can be made either by (i) the **appointed representative** or (ii) any other person having a **mandate**
- EPAs with appropriate qualifications may register as representatives during **one year from the entry into force**
- In principle the possibility to **register as a representative** will be available **as of the start of the sunrise period**, but it is unknown when the registration as representative will be effective

To be on the safe side, until this is clarified, use mandate
Opt-out request (test version)
Opt-out may be challenged

- Registration of the opt-out does not guarantee its validity
- In a DNI or a revocation action against a EP classic patent
  - The Registry will check whether an opt-out has been registered and if so inform the claimant, who may withdraw or amend the request
  - Even if the patent has been opted-out, the Registry will not refuse the action. It is up to the defendant to challenge the jurisdiction of the UPC by a preliminary objection (within 1 month!)
  - The claimant may reply within 14 days and the judge-rapporteur will decide on the objection as soon as practicable
  - The decision may be appealed (if an appeal is lodged, proceedings at first instance may be stayed)

If the opt-out has not been done correctly, the UPC may be competent
Unauthorised opt-out (or opt-in)

- Adopted by Administrative Committee in the meeting of 08.07.2022
- The proprietor/applicant of an EP patent or holder of a SPC in relation to which an opt-out (or opt-in) is entered in the register may request removal of the entry of the unauthorised opt-out (or opt-in) (Rule 5A RoP)
  - Reasons for removal must be included in the request
- The Registrar will decide as soon as practicable
- The decision on the request for removal may be subject to an application for review to the President of the Court of Appeal
  - within one month of the notification of the decision setting out the request, facts, evidence and arguments
  - If the Application for review is allowable, the President of the Court of Appeal will remove the opt-out (or opt-in)
UPC shared jurisdiction with national courts (non-opted out patents)

- The Brussels Regulation Ia No 1215/2012 established the jurisdiction and enforcement of judgments within the EU. Amended (Reg. No 542/2014) to incorporate rules for UPC as common court to several MS
  - UPC takes the place of the national court of a Member State of EU if said Member State participates in the UPCA

- Basic rules for general jurisdiction
  - EU nationals can be sued in their EU state of domicile
    - Defendants domiciled in an EU non-UPCA Member State (e.g., Spain) or in a Member State of the Lugano Convention (IS, NO, CH) can only be sued in their respective national court
    - For defendants domiciled outside the EU and the Lugano area (Third States), jurisdiction is generally determined under the rules of national law
UPC shared jurisdiction with national courts (non-opted out patents)

- Basic rules for **special jurisdiction**
- The place where the **harmful event** occurred or may occur
- **Exclusive jurisdiction**
  - For **validity** matters only the court of the EU Member State in which a patent is registered has exclusive jurisdiction

<table>
<thead>
<tr>
<th>Examples of special jurisdiction</th>

<tr>
<td></td>
<td>AI (based in ES) sells potentially infringing products in PL</td>
</tr>
<tr>
<td></td>
<td><strong>UPC does not have jurisdiction</strong></td>
</tr>
</tbody>
</table>
Conflicts UPC-national courts

- **Brussels Regulation Ia** includes rules designed to avoid the same matters being litigated before the courts of different member states, as this can result in conflicting judgments.

- **Lis pendens rule**: In proceedings brought to different courts involving the *same cause of action* and the *same parties*, the second court must *stay* its proceedings.
  - Identity of parties:
    - Licensor ≠ licensee
    - Parent company and wholly owned subsidiary?
  - Identity of Cause of Action
    - infringement = declaration of non-infringement
    - revocation = counterclaim for revocation
    - infringement ≠ revocation
## Examples of jurisdiction

### Same action & same parties
- P is the owner of a EP (not opted-out)
- AI brings a **declaration of non-infringement** for acts carried out in NL before **UPC** (CD)
- P **infringement action before NL court**
  - NL court **must stay/decline jurisdiction**

### Related actions
- P is the owner of a EP (not opted-out)
- AI brings a **revocation action before NL court**
  - NL court validity restricted to NL part
- P brings a **infringement action for acts carried out in NL before UPC**
  - UPC court **may stay** infringement in NL
Examples of jurisdiction- First action before a national court

- P is the owner of a EP (not opted-out)
- P notices that AI (based outside the UPC territory) sells potentially infringing products in FR
- P brings an infringement action against AI before a FR court
- Later P becomes aware of acts of AI in IT, LU, PT
- P brings an infringement action for FR, IT, LU, PT against AI before the UPC (Central Division)
- AI brings a counterclaim for revocation before UPC
  - To avoid the *lis pendens* rule, is it possible to “carve out” the FR part?

- Same action (infringement FR) same parties

- Analogue case brought up in a Mock trial 21.11.2022 organised by the Union pour la Juridiction unifiée du brevet (UJUB) with Klaus Grabinski acting as Presiding judge
Mock trial 21.11.2022 - carve-out

- **Carve out** of the FR part in the infringement action is **admissible**

- Claimant **may decide to restrict the claim** territorially (The Court decides in accordance with the requests submitted by the parties and will not award more than is requested)
  - Some rights remain national: prior use right
  - Infringement may take place in some MS only

- Parallel case in Community trade mark (CTM) law: DHL vs Chronopost (C- 235/09, 12 April 2011)
  - Territorial scope of the prohibition may be restricted if the claimant sets a territorial restriction on its application for injunctive relief
Mock trial 21.11.2022- other questions

- If the carve-out is admissible, must the UPC stay the infringement action for IT, LU, PT?
  - UPC deciding on infringement for IT, LU, PT **must not be stayed**
    (different parts of EP patent, currently national courts do not stay)

- If the carve-out is admissible (no infringement decision for FR part), can the revocation for the FR part still be decided?
  - Before the Central Division it should be possible to deal with the revocation (including the FR part) even if there is no corresponding infringement action for the FR part

4th UJUB Mock Trial 21 November 2022:
