

QUALITY POLICY

The activities of the research group **Metabolisme Lipídic- CEREMET** of the University of Barcelona **cover** the management and development of research projects and knowledge transfer within the molecular biochemistry and biology field. The Group wants to develop these activities with the highest scientific rigor and in a context of professional ethics.

Mission

- To contribute with basic and applied research to the advance of knowledge, innovation and business competitiveness.

Vision

- To become a model laboratory in the performance of public and private R+D+i projects offering a flexible research adapted to social needs at national and international level.

Values

- To ensure **reliability** and **objectivity** of the obtained results.
- To preserve the **confidentiality** of data and information obtained as a result of services performed.
- To ensure adequate **dissemination** of non-confidential results, which may have scientific and/or social interest, in agreement with the promoter.
- To contribute actively and voluntarily to the social, economic and environmental improvement.
- To ensure that all services provided are **respectful** of both **people** and **environment**.
- To give **extra value** with **training** of team members in **quality** aspects in the field of research.

The group has a **quality management system** based on the ISO9001 standard, which allows it to continuously improve the efficacy and effectiveness of the processes and to ensure satisfaction of the promoter' s requirements as well as legal and regulatory applicable requirements.

This quality policy provides the framework for management quality assurance and conduct of the group activities. This policy is distributed to all personnel and periodically reviewed.

Barcelona, February 1th, 2024

Dra. Eva Pardina
Head of the Group
