

Grants for Master Students

The SGR group "**Computer Vision in UB**" from Universitat de Barcelona opens 4 grants for MSc students.

Our group focus on the development of new computer vision and machine learning algorithms. Currently, we are working in the project "*Visual recognition using end-to-end learning methodology: theory and applications*" and we plan to study Deep Learning techniques for the following problems:

- Neural Parametrizations of Probabilistic Models and its application to image regression tasks. Contact: Jordi Vitrià.
- Neuroimage analysis using Deep Learning. Contact: Laura Igual
- Egovision analysis. Contact: Petia Radeva
- Non visual concepts of images. Contact: Santi Seguí

We are seeking bright and highly motivated students with an interest in deepening their research background in the topics listed above. Successful candidates will have the opportunity to join the research group to carry out their PhD thesis by applying to a competitive grant (opening November 2016).

Timing and Conditions

The duration of each grant is 4 months (from September 1th to December 31th) with 25 hours per week.

Amount of the grants

The amount of the grants is 524.36€ net per month.

Application

Interested candidates should fill the application form [here](#).

The selection criteria will be conducted in two steps. In the first one candidates will be ranked according the submitted information, and for the top ten, an interview will be appointed to finally assign the grants.

Requirements for applicants

We encourage applications from students with excellent qualifications and highly motivated in cutting-edge areas of Machine Learning, Computer Vision and Data Science fields. The grant can be to prepare the Final Master project.

Deadline

This application call opens on July 1th and closes on July 17th.

Contacts

Jordi Vitrià (jordi.vitria@ub.edu), Santi Seguí (santi.segui@ub.edu), Petia Radeva (petia.ivanova@ub.edu) and Laura Igual (ligual@ub.edu)
