

General information

Total number credits: 90
Duration: one and a half years
Modality: on-site classes
Students' profile: research-oriented students and professionals
Programme coordinator: Dr. Joan J. Queralt

Students' profile

The objective of this master's programme is the advanced study of criminology. The Master is aimed to the advanced study of criminological issues including Criminal Law, Criminology, Anthropology, Economics, social Work, and the juridical, political and social Sciences. Depending on their previous level, some candidates may be required to take some levelling modules.

Objectives

The main goals of the programme are:

- ↳ To become familiar with and apply the most recent international developments in criminological science for the transversal analysis of complex security and crime related issues.
- ↳ To be able to design, lead and manage competitive scientific research projects on crime issues, its causal factors, consequences, prevention, as well as the related organizations and institutions.
- ↳ To use new criminal, psychological and social models of planning, management, and intervention on criminal and security problems.
- ↳ To follow internationally adopted scientific criteria to assess security and prevention policies and programmes.
