MASSIVE

Modelling Advice and Support
Services to Integrate the Virtual
component in Higher Education

www.massive-project.org

MASSIVE

Our aims

MASSIVE will design a model for the support services that are required for European traditional universities to implement elearning in teaching.

Six service areas have been identified as essential for this implementation in EU higher education institutions:

- 1 Evolution of University Libraries
- 2 Management of IPR issues
- 3 Support to Teaching staff
- 4 Support to Students
- 5 University Strategies for the integration of ICT into teaching/learning practice
- 6 Good design of online courses

Our workplan

We will research existing experiences and approaches from previous projects in elearning support services in traditional universities.

According to the research results, we have collected 12 case studies describing different university approaches that will be the basis to build a PEER REVIEW MODEL between Universities.

We will also be developing 3 seminars focusing on the peer review in the 6 service areas that have already been identified.

The seminars, which will take place after some of the peer review sessions, will be held at the:

- University of Barcelona (ES)
- Budapest University of Technology and Economics (HU)
- University of Bergen (NO)

Would you like to be part of the MASSIVE Peer Review model?

Please contact Isabel Perez at the University of Granada: iperez@ugr.es
