International PhD Programme

“Biomolecular Technology of Proteins (BioToP)”

at the Vienna Institute of BioTechnology of BOKU

University of Natural Resources and Life Sciences, Vienna, Austria

fully-funded

PhD student positions

for three years

BioToP offers an inter- and multi-disciplinary research-based doctoral education at the interface of basic and applied science in the field of protein biotechnology.

BioToP offers a challenging scientific environment with state-of-the-art facilities and provides comprehensive and thorough up-to-date research training in the fields of:

- structure-function analysis, engineering and design of proteins
- protein synthesis, targeting and post-translational modifications
- expression systems and cell factories
- bioinformatics and molecular modelling

The BioToP-specific educational programme comprises lectures, seminars and instructional courses that complement the research work in the participating groups.

Highly qualified and motivated students of any nationality are invited to apply for the 3-year studentships. Funding will be according to the salary scheme of the Austrian Science Fund. Additionally students will receive funding for research stays abroad and for the participation at international conferences.

Further information on research projects as well as application guidelines and forms are available at: http://biotop.boku.ac.at

Application deadline: February 13th, 2019
