Skills for a changing world

We know that today’s learners are growing up in a different interconnected age. These skills are growing in importance and now we need to consider how we can support children in developing these skills.

Content and communication: cornerstones of success

Lessons based on real-world content motivate children to communicate and make learning engaging and memorable.

A Calmer Classroom through Mindfulness

Today’s students have a lot of stress and a short attention span. Many educational strategies will help, but one that will deal with exam stress and help them think of how they’re feeling instead of reacting to it is mindfulness. You will learn strategies to help you deal with stress and anxiety, a tool you can use both in the present moment and in your teaching.
