

Digital Social Science Core Facility

The 3rd Barcelona-Gothenburg-Bergen Workshop on Experimental Political Science

CALL FOR PAPERS

Dates: April 24th and 25th, 2017

Venue: Digital Social Science Core Facility, University of Bergen

Scientific committee: Peter Esaiasson (University of Gothenburg), Jordi Muñoz (University of Barcelona), Wouter van der Brug (University of Amsterdam), Sara B. Hobolt (London School of Economics), Elisabeth Ivarsflaten (University of Bergen), and Rune Stubager (Aarhus University).

Deadline for paper proposals: 31st January 2017

The workshop is an event conceived to bring together researchers who use experimental methodology to address political phenomena. Empirical works from any subfield of the discipline are welcome. We also welcome methodological contributions, and works that explore the relationship between experimental and observational data. We encourage both advanced papers and presentations of experimental designs at an early stage. Both senior and junior scholars are encouraged to participate. This is the third edition of the workshop. Last year it gathered a diverse set of scholars from several countries with high quality contributions. The previous years full program and papers [can be found here](#).

The workshop will accommodate about 15 presentations over the course of two days, some plus a keynote lecture. It will be followed by a Ph D course on experimental design and analysis in political science taught by Professor Mike Tomz, Stanford University. The course will be open to 32 Ph D candidates from across Europe.

We invite those interested in participating in the workshop to submit paper proposals (including name, affiliation and position of author/s and an abstract) before the 31st January 2017 through this [form](#) or to this email: polexp@ub.edu The paper selection will be notified by 28th February 2017.

Participants are encouraged to seek funding for travel from their home institutions, although a limited number travel grants might be available for PhD Students with quality contributions and no alternative sources of funding. Coffee breaks and a workshop dinner will be covered by the organizers. Please direct general enquiries to elisabeth.ivarsflaten@uib.no and logistic questions to hiwa.malen@uib.no
