III World Conference of Spatial Econometrics

The 3rd World Conference of the Spatial Econometrics Association has the aim to bring together economists, econometricians and regional scientists to discuss the present achievements and future challenges in this field.

We are pleased to announce that, after a peer review process, a special issue of *Economic Modelling* will be published with a selection of the papers presented at the conference.

Congress Themes

A non-exhaustive list of the empirical themes the SEA Conference 2009 is going to address is the following:

- Growth and convergence
- Human capital
- Inequality
- Knowledge diffusion
- Agglomeration of economic activity
- Foreign direct investment
- Labour market and migration
- Environment and sustainability
- Externalities, spillovers and flows
- Land use, real estate and housing markets

Also, from a theoretical and methodological point of view:

- Exploratory spatial data analysis
- Spatial regression models
- GMM estimators for spatial models
- Spatial panel data models
- Continuous-time spatial econometrics
- Space-time aggregation
- Spatial filtering
