

Symposium The Energy-transition in a Comparative Perspective

Wednesday May 24th 2023 13.00-17.30

The energy-transition has arrived. Normative arrangements concerning energy need to change, from production, through transport, in- and export, distribution and consumption, in a sustainable manner – as it is fundamentally determined by existential ecological issues. It questions our normative framework, demanding it to adapt, from its philosophical fundaments, through the public and private law domain, all in a social and political playing field between mandatory law and individual autonomy.

Our topic by nature crosses boundaries of jurisdictions, and for that reason comparative law and its methodology is eminently appropriate to analytically and synthetically rethink how law can support this transition.

Distinguished speakers from the Dutch, Hungarian, German, Spanish and Catalan jurisdictions will address this topic from various angles. We look forward to a very interesting afternoon!

Program

- **Dr. Kati Cseres**
Associate Professor of Law, Amsterdam Centre for European Law & Governance,
University of Amsterdam
Consumer-centred energy transition from an EU, Dutch and Hungarian perspective
- **Prof. Dr. Bernhard Kreße**
Lehrstuhl für Bürgerliches Recht, Deutsches und Europäisches Wirtschaftsrecht, Energierecht
und Rechtsvergleichung, FernUniversität in Hagen
Energytransition-issues in German law
- **Dr. Miriam Anderson**
Associate Professor of Civil Law, University of Barcelona
The Renovation Wave: Spanish and Catalan Private Law Perspectives
- **Mr. Ines Hoving (LLM, Utrecht University)**
Masterstudent Information Law, University of Amsterdam
Accession and financing in the energy-transition
- **Dr. mr. Niels Graaf**
Assistant Professor of Constitutional Law, University of Amsterdam
A new transnational judicial culture? The use of foreign law in climate decisions
