ACCOMPLISSH

Results WP2b

- Based on 14 focus groups interviews with representatives from the entire quadruple helix.
- Report 1 May 2017:
Quadruple Helix Co-creation in SSH– Experiences, Considerations, Lessons Learned
=> Most / Least important recommendations
- Conducted follow-up individual interviews with consortium PIs

Recommendations

- Allocate enough time, financial funds and adequate human resources.
- From the onset, involve all stakeholders in defining area of concern
- Address differences in institutional logics, rationale, incentives and roles
- Address differences in nomenclature, language and communication
- Challenges your own and each other's frame of thinking
- Provide spaces for interaction
- Use facilitators, translators and harbor pilots to optimize collaboration
- Learn from good practice and research
- Address questions of impact, validation and valorization from the start
- Communication is also about listening
- Make the case for SSH

Thank you!
