

1st LGBTQ+ in STEM Day

5th of July 2018

**Faculty of Psychology, with support from the Institute of Neurosciences
University of Barcelona**

The fifth of July is the First International Day of LGBTQ+ People in Science, Technology, Engineering and Maths (more information available under <http://prideinstem.org/lgbtstemday/> and on Twitter under #LGBTStemDay).

The Faculty of Psychology, with the support of the Institute of Neurosciences, and under coordination of Björn Jörges, would like to use this occasion to host the 1st LGBTQ+ in STEM Day at Campus Mundet to draw attention to the specific challenges that LGBTQ+ persons face in academic settings, as well as to give members of the LGBTQ+ collective an opportunity to showcase some of their work and increase visibility of LGBTQ+ scientists.

The event, organized by the PhD researcher Björn Jörges, will be hosted during the afternoon of the 5th of July (Thursday) at Sala de Graus at the Faculty of Psychology.

The following schedule may still be subject to minor changes:

| | |
|-------------|--|
| 15h-15h30 | Challenges of LGBTQ+ persons in science |
| 15h30-16h30 | Research on the LGBTQ+ collective conducted at the University of Barcelona |
| 16h30-17h30 | Short presentations by LGBTQ+ identifying scientists about their research |
| 17h30 | How is it to be LGBTQ+ in science? Personal experiences and socializing |

Location: Campus Mundet, Edifici Ponent, 2n Vagó, Sala de Graus (Deganat)

We are still looking for collaborators, especially from the LGBTQ+ community, but also allies.

So, if ...

- you are conducting research about LGBTQ+ people
- you are a member of the LGBTQ+ community and want to present any of your work
- you would like to share your personal experiences as member of the LGBTQ+ collective in science

... please write an email to LGBTStemDay.BCN@gmail.com with a very short exposé of the topic you would like to present and how you identify within the LGBTQ+ collective (if you do). We would also appreciate if you could include any further information that could help us to make the lineup as intersectional and inclusive as possible.
