LEARNING AND COGNITION: THE SPATIAL DOMAIN

Professor V.D. Chamizo
(victoria.diez.chamizo@ub.edu)

Universitat de Barcelona
Departament de Psicologia Bàsica
(group web page: http://www.gracec.info/)

Topics of the course:

1. Spatial tasks and most frequent measures (Morris, 1981).
2. Some history: The legacy of Tolman (1948) vs. the proposal by O'Keefe and Nadel (1978).
4. Single landmark learning and learning based on two cues (i.e., quantitative and qualitative sex differences) [Forcano et al., 2009; Rodríguez et al., 2010].
5. Age and navigation strategies (Rodríguez et al., 2013).
6. Human subjects importance and applications (Beinhoff et al., 2008).
