

Title: **Preparation of new laboratory practices**

Student: Fernando Gimeno Roce

Date: Juny of 2019

Supervisor/s: Dr. Jacinto Guiteras Rodriguez
Departament of Enginyeria Química i Química analítica

The objective of this project is the development of new practives for the Basic Laboratory of Analytical Chemistry, and so improve the formation of the students. This objective may be fulfilled in three differents ways:

1. Preparation of new, more complex, samples.
2. Development of new procedures
3. Introduction of changes into already existing procededures and explaining the results
