

ORGANIC CHEMISTRY MASTER SCHEDULE FOR 2020-21

Classes between September 21 and October 16 (inclusive). Room 201

	Monday	Tuesday	Wednesday	Thursday	Friday
15h-16h	Biological Chemistry Prof. M. Pons	Design and Methods of Organic Synthesis Prof. A. Moyano	Biological Chemistry Prof. M. Pons	Design and Methods of Organic Synthesis Prof. A. Moyano	Theoretical Organic Chemistry Prof. X. Ariza
16h-17h					Biological Chemistry Prof. M. Pons
17h-18h	Theoretical Organic Chemistry Prof. X. Ariza	Theoretical Organic Chemistry Prof. X. Ariza	Theoretical Organic Chemistry Prof. X. Ariza	Theoretical Organic Chemistry Prof. X. Ariza	Design and Methods of Organic Synthesis Prof. A. Moyano
18h-19h	Stereoselective Organic Chemistry Prof. P. Romea	Chemistry of Peptides and Nucleic Acids Prof. A. Grandas/V. Marchán	Chemistry of Peptides and Nucleic Acids Prof. A. Grandas/V. Marchán	Stereoselective Organic Chemistry Prof. P. Romea	Stereoselective Organic Chemistry Prof. P. Romea

Classes between October 19 and October 30 (inclusive). Room 201

	Monday	Tuesday	Wednesday	Thursday	Friday
15h-16h	Biological Chemistry Prof. M. Pons	Design and Methods of Organic Synthesis Prof. A. Moyano	Biological Chemistry Prof. M. Pons	Design and Methods of Organic Synthesis Prof. A. Moyano	Theoretical Organic Chemistry Prof. X. Ariza
16h-17h					Biological Chemistry Prof. M. Pons
17h-18h	Theoretical Organic Chemistry Prof. X. Ariza	Theoretical Organic Chemistry Prof. X. Ariza	Theoretical Organic Chemistry Prof. X. Ariza	Theoretical Organic Chemistry Prof. X. Ariza	Design and Methods of Organic Synthesis Prof. A. Moyano
18h-19h	Stereoselective Organic Chemistry Prof. P. Romea	Stereoselective Organic Chemistry Prof. P. Romea	Chemistry of Peptides and Nucleic Acids Prof. A. Grandas/V. Marchán	Chemistry of Peptides and Nucleic Acids Prof. A. Grandas/V. Marchán	Chemistry of Peptides and Nucleic Acids Prof. A. Grandas/V. Marchán

Classes between November 9 and December 22 (inclusive). Room 202 (morning) and 201 (afternoon)

	Monday	Tuesday	Wednesday	Thursday	Friday
9h-11h	Molecular Modelling Prof. C. Rovira			Molecular Modelling Prof. C. Rovira	
11h-13h	Medicinal Chemistry Prof. J. Robles	Organometallic Chemistry Prof. X. Verdaguer	Organic Materials Prof. D. Velasco/J. Crusats	Organometallic Chemistry Prof. X. Verdaguer	Organic Materials Prof. D. Velasco/J. Crusats
15h-16h	Heterocyclic Chemistry Prof. A. M. Costa	Heterocyclic Chemistry Prof. A. M. Costa	Heterocyclic Chemistry Prof. A. M. Costa	Heterocyclic Chemistry Prof. A. M. Costa	Medicinal Chemistry Prof. J. Robles
16h-17h	Advanced Structural Organic Chemistry Prof. J. Farràs	Industrial Organic Chemistry Prof. A. Montaña	Advanced Structural Organic Chemistry Prof. J. Farràs	Industrial Organic Chemistry Prof. A. Montaña	
17h-18h					Spectroscopic and Laboratory Techniques in Organic Chemistry Prof. N. Escaja
18-19h	Stereoselective Organic Chemistry Prof. P. Romea	Stereoselective Organic Chemistry Prof. P. Romea	Chemistry of Peptides and Nucleic Acids Prof. A. Grandas/V. Marchán	Chemistry of Peptides and Nucleic Acids Prof. A. Grandas/V. Marchán	

Public holidays: September 24, October 12, December 8 (furthermore there are no classes on September 24 and December 7)

AVALUACIÓ:

Biological Chemistry: November 2

Theoretical Organic Chemistry: November 4

Design and Methods of Organic Synthesis: November 6

Stereoselective Organic Synthesis: January 8

Medicinal Chemistry: January 11

Heterocyclic Chemistry: January 13

Molecular Modelling: January 15

Chemistry of Peptides and Nucleic Acids: January 18

Organometallic Chemistry: January 20

Organic Materials: January 22

Industrial Organic Chemistry: January 25

Advanced Structural Organic Chemistry: January 27

Spectroscopic and Laboratory Techniques in Organic Chemistry: February 1
