The IP department in a pharmaceutical company
What is ‘IP’?

- IP means ‘Intellectual Property’. But...

What is Intellectual Property?

- Intellectual Property refers to creations of the mind, such as:
  - inventions
  - knowledge (inventions are part of it)
  - designs
  - symbols, names and images used in commerce
  - literary, scientific and artistic works
How is IP protected?

- inventions → patents / secret
- knowledge → special exclusivities/secret
- designs → designs
- symbols, names and images → trademarks
- Literary, scientific or artistic works → copyright

Propietat Intellectual

Industrial Property Propietat Industrial

Intellectual Property
How is knowledge protected in pharma industry?

- Inventions -> patents.
- Inventions or any other type of knowledge -> secret.

Examples:
  - The best pricing strategies for dermatological products
  - Which types of product have higher margins?

Knowledge acquired by developing a new drug: clinical and toxicology studies, stability, etc., included in a registration dossier is protected by law. No other company can rely on it to file a dossier for the same product for a period of some years (data exclusivity).

- If a drug is approved for an orphan indication (such as a rare disease), no similar product can be filed for several years for this indication (orphan exclusivity).
  
- Etc.

Etc.
What is a Patent?

A patent is an exclusive right granted given by the government for an invention, e.g., a product or process that provides a new technical solution to a problem.

<table>
<thead>
<tr>
<th>Protection provided</th>
<th>The patent owner can prevent others from using his/her invention without his permission</th>
</tr>
</thead>
<tbody>
<tr>
<td>Duration</td>
<td>Generally for 20 years</td>
</tr>
<tr>
<td>Requirements</td>
<td>Invention must be novel, inventive and industrially applicable</td>
</tr>
<tr>
<td>Aim</td>
<td>To reward inventors for sharing their findings with society and making it to progress</td>
</tr>
</tbody>
</table>
What is an Industrial Design?

An industrial design refers to the ornamental or aesthetic aspects of an article.

It may consist of:

- three-dimensional features
- two-dimensional features

<table>
<thead>
<tr>
<th>Duration</th>
<th>Usually range from 10 to 25 years (it depends on the country)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Requirements</td>
<td>New or original and nonfunctional</td>
</tr>
<tr>
<td>Aim</td>
<td>An industrial design is primarily of an aesthetic nature. Any technical features of the article to which it is applied are not protected by the design registration (they could be protected by a patent)</td>
</tr>
</tbody>
</table>
### What is a trademark?

A trademark is a distinctive sign that identifies certain goods or services produced or provided by an individual or a company.

<table>
<thead>
<tr>
<th>Duration</th>
<th>For life (if you renew and use it)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Requirements</td>
<td>Distinctiveness, graphical representation…</td>
</tr>
<tr>
<td>Aim</td>
<td>Trademarks helps consumers to identify and purchase a product or service based on whether its specific characteristics and quality – as indicated by its unique trademark - meets their needs</td>
</tr>
</tbody>
</table>

Tasks in the patent department of a pharmaceutical company

- Following the path of drug discovery & development (I)

- Planning drug target or disease
- Freedom to operate use & compounds
- Drug discovery
- Freedom-to-operate & protect candidates
- Funding
- Competitive intelligence
- Candidate selection & preclinical
- Freedom-to-operate & protect candidates
- Licensing-out/in
Tasks in the patent department of a pharmaceutical company

- Clinical development
- Protect new route of synthesis, uses, formulations, dose scheduling, combinations, …
- Evaluate corporate publications for possible inventions
- Worldwide dossier filing & obtaining MA
- Regulatory requirements (patent listing), Patent Term Extensions, SPC,…
Tasks in the patent department of a pharmaceutical company

- Following the path of drug marketing (I)
  - Generic planning
  - Freedom-to-operate, identify key patents and regulatory exclusivities and establish generic launch date

- Generic development
  - Develop and protect non-infringing route of synthesis, formulations & carve out indications

- Marketing of a new drug
  - Protect line extensions, new uses, formulations, combinations,...
Tasks in the patent department of a pharmaceutical company

• Following the path of drug marketing (II)

- Generic development
- Invalidate patents (oppositions, IPR, courts)
- Defend against infringement actions
- Licensing out/in

- Marketing of a new drug
- Defend patents and sue possible infringers
**IP Department personnel**

The composition depends on the size and type of company and its aims.

<table>
<thead>
<tr>
<th>Members</th>
<th>Details</th>
</tr>
</thead>
<tbody>
<tr>
<td>Technical specialists</td>
<td>Chemists, pharmacists, biologists, biotechnologists, engineers, etc. with legal knowledge. They deal mostly with patents and act as internal patent attorneys.</td>
</tr>
<tr>
<td>Lawyers</td>
<td>They could be inside the department, cooperate from the Legal Department or be external specialized lawyers. They deal mostly with [pre]litigation activities and general legal counsel.</td>
</tr>
<tr>
<td>Paralegals (specialized administrative support)</td>
<td>They deal with the formalities to prosecute and maintain the IP portfolio and can also work from an outsourced IP firm.</td>
</tr>
</tbody>
</table>
Personal skills

• Analytical skills
• Strategic thinking: moving scenarios
• Discipline and patience: not easy to find key documents
• Responsibility: if you fail, your company will suffer
• Self-learning and self-motivation
• Search skills
• Drafting skills (need to be understood)
  • Patent applications
  • Communications to patent offices/courts
  • Internal reports
Career development at an IP Department for patent specialist

- Explore other technical areas
- Legal training specially for European and US patent and pharmaceutical law.

How to get it?
- Preparation to be European/Spanish Patent Attorney
- Learn from your cases looking at the prosecution of some patents and contact with lawyers
- Litigation experience
- Many training opportunities: courses, webinars...
- Numerous blogs discuss IP cases
- Development of language skills

There are plenty of things to learn in this profession and many changes…
Thank you
