- 2- DU5302892

Notes:

- The candidates that have not paid the amount of registration or delivered the complementary required documents before the Friday March 12st have not taken into consideration in the elaboration of this first list of master admitted candidates.
- In this first meeting of the Master Coordinating Committee, it has been established that a maximum of 10 candidates could be admitted in this first recruitment selection.
- In the selection of admitted candidates we have prioritized the ones coming from foreign countries in order to facilitate the long document processing (i.e., visa application) that they need for enrolling in our master. In the third and fourth selection meeting, in contrast, we will prioritize the candidates coming from Spain or from CEE countries.
- The candidates included in the waiting list will be admitted if any of the accepted candidates declines to be enrolled in the master. Otherwise, their application will be considered again in the second meeting of the Master Coordinating Committee that will take place at mid-May in which up to 10 new candidates will be admitted
