# 1. Background: before ENOBA (2014-2020)

The challenge of building the story of our experience in the ENOBA project has caused us the need to review our process as a whole, understanding that this project is still a new collective tool to continue in the task of disseminating the Baskin as an opportunity to build a more inclusive society

### 3. Final thoughts and perspectives: after ENOBA (2014-2020)

Once the insertion of Baskin Mundet in the community of the Mundet campus of the University of Barcelona and in the European community of Baskin has been achieved, it is still pending to make progress in the construction of the Catalan community of Baskin

- Participation in the activities of the Fundació Basket Català project that takes place in Banyoles is a good opportunity to implement Baskin in the Pla de l'Estany region. The support work for CB Banyoles and the rest of the interested entities seems key. Also to insist again on the collaboration with the Fundació del Basket Català
- Collaboration with the INEFC is also important to promote the training of new trainers that allow the expansion of the Baskin community in Catalonia
