
Presentation

This international conference, as in previous editions, aims to promote academic reflection on the most recent debates regarding the framework of the relations between domestic and international Law, focusing this time, in the various fields of specialisation of legal work, on the impact of the legal instruments of Soft Law in contemporary legal systems. In this manner, through a transversal approach that incorporates several areas of Law, the intention is to foster a space for dialogue that addresses the agreements and disagreements, advances and setbacks, which frequently occur in the interaction between contemporary legal systems and Soft Law.

*Only abstracts proposals from doctoral students will be accepted.
