

Màster en Nanociència i Nanotecnologia

Universitat de Barcelona

Coordinador Sergi Hernández (shernandez@ub.edu)

WHAT IS NANOSCIENCE?

The word **Nanoscience** refers to the study, manipulation and engineering of matter, particles and structures on the nanometer scale (one millionth of a millimeter, the scale of atoms and molecules). Important properties of materials, such as the electrical, optical, thermal and mechanical properties, are determined by the way molecules and atoms assemble on the nanoscale into larger structures. Moreover, in nanometer size structures these properties often differ from those on macroscale, because quantum mechanical effects become important.

WHAT IS NANOTECHNOLOGY?

Nanotechnology is the application of nanoscience leading to the use of new nanomaterials and nanosize components in useful products. Nanotechnology will eventually provide us with the ability to design custom-made materials and products with new enhanced properties, new nanoelectronics components, new types of “smart” medicines and sensors, and even interfaces between electronics and biological systems...

These newborn scientific disciplines are situated at the interface between physics, chemistry, materials science, microelectronics, biochemistry, and biotechnology. Control of these disciplines therefore requires an academic and multidisciplinary scientific education..

WHY STUDY NANOSCIENCE & NANOTECHNOLOGY?

Nanoscience and nanotechnology are at the forefront of modern research. The fast growing economy in this area requires experts who have an outstanding knowledge of nanoscience in combination with the skills to apply this knowledge in new products. A multidisciplinary scientific education is crucial to provide industry and research institutes with top quality experts who have a generic background in the different subdisciplines such as electronics, physics, chemistry, material science, biotechnology..., and at the same time be experts in one particular field. This is what is offered in this master programme.

In the **Master of Nanoscience and Nanotechnology**, you will learn the basics of physics, biology, chemistry and pharmacy at the nanometer scale. The combination of a solid multidisciplinary scientific basis and an individual high level specialization in a certain area of Nanoscience is the philosophy of the program.

Prof. Dr. Guillem Aromí Bedmar

Director of IN²UB

What is the Mission of the IN²UB ?

A Centre of Reference for the **Creation of Knowledge** in Nanoscience and Nanotechnology, for **Education** through Research and for the **Transfer of Knowledge**.

Participation of 5 different Faculties from UB:

Research Lines of the IN²UB

- 1) NanoModeling, Simulation and Nanoscopic Methods (NanoMet)**
- 2) Nanobioscience, Nanobiomechanics and BioNanotechnology (NanoBio)**
- 3) Nanopharmaceutics and Nanomedicine (NanoPharmaMed)**
- 4) Nanomagnetism and Spintronics (NanoMagnetics)**
- 5) Nanoelectronics, Nano-optics and Nanophotonics (NanoPhotoElectro)**
- 6) Nanostructured materials (NanosMat)**
- 7) Nanoenergy: Production and Storage (NanoEnergy)**

- **110 permanent research staff**
- **35 PostDocs, 65 PhD Students**
- **47 Research groups from 5 faculties**

Research Outputs 2013-2017

1590 peer reviewed scientific papers
(Scimago Journal Ranking)

- **75.85%** in the first quartile (Q1)
- **36.25%** in the first decil (D1)
- average of **8.74** citations/paper.

- Collaborations with 42 companies

XIV BUSINESS FORUM

Faculties of Physics, Chemistry , Mathematics and Computer Science,
Earth Sciences and Biology

April 10th 2019, from 10h to 17h at the Physics and Chemistry Faculties Building

http://www.ub.edu/fisica/firaempreses/index_en.html

- 71 Patents
- 4 spin-offs companies created

Scientific and Strategic Goals

-  **Supramolecular Chemistry for Nanomedicine**
-  **Nanodevice Fabrication**
-  **Biophysics and Biomechanics**
-  **Nanoscopies and Instrumental Development**
-  **Modelling and Simulation of Nanosystems**
-  **Nanopharmacy and Nanotoxicity**

INVOLVED INSTITUTIONS

● University of Barcelona

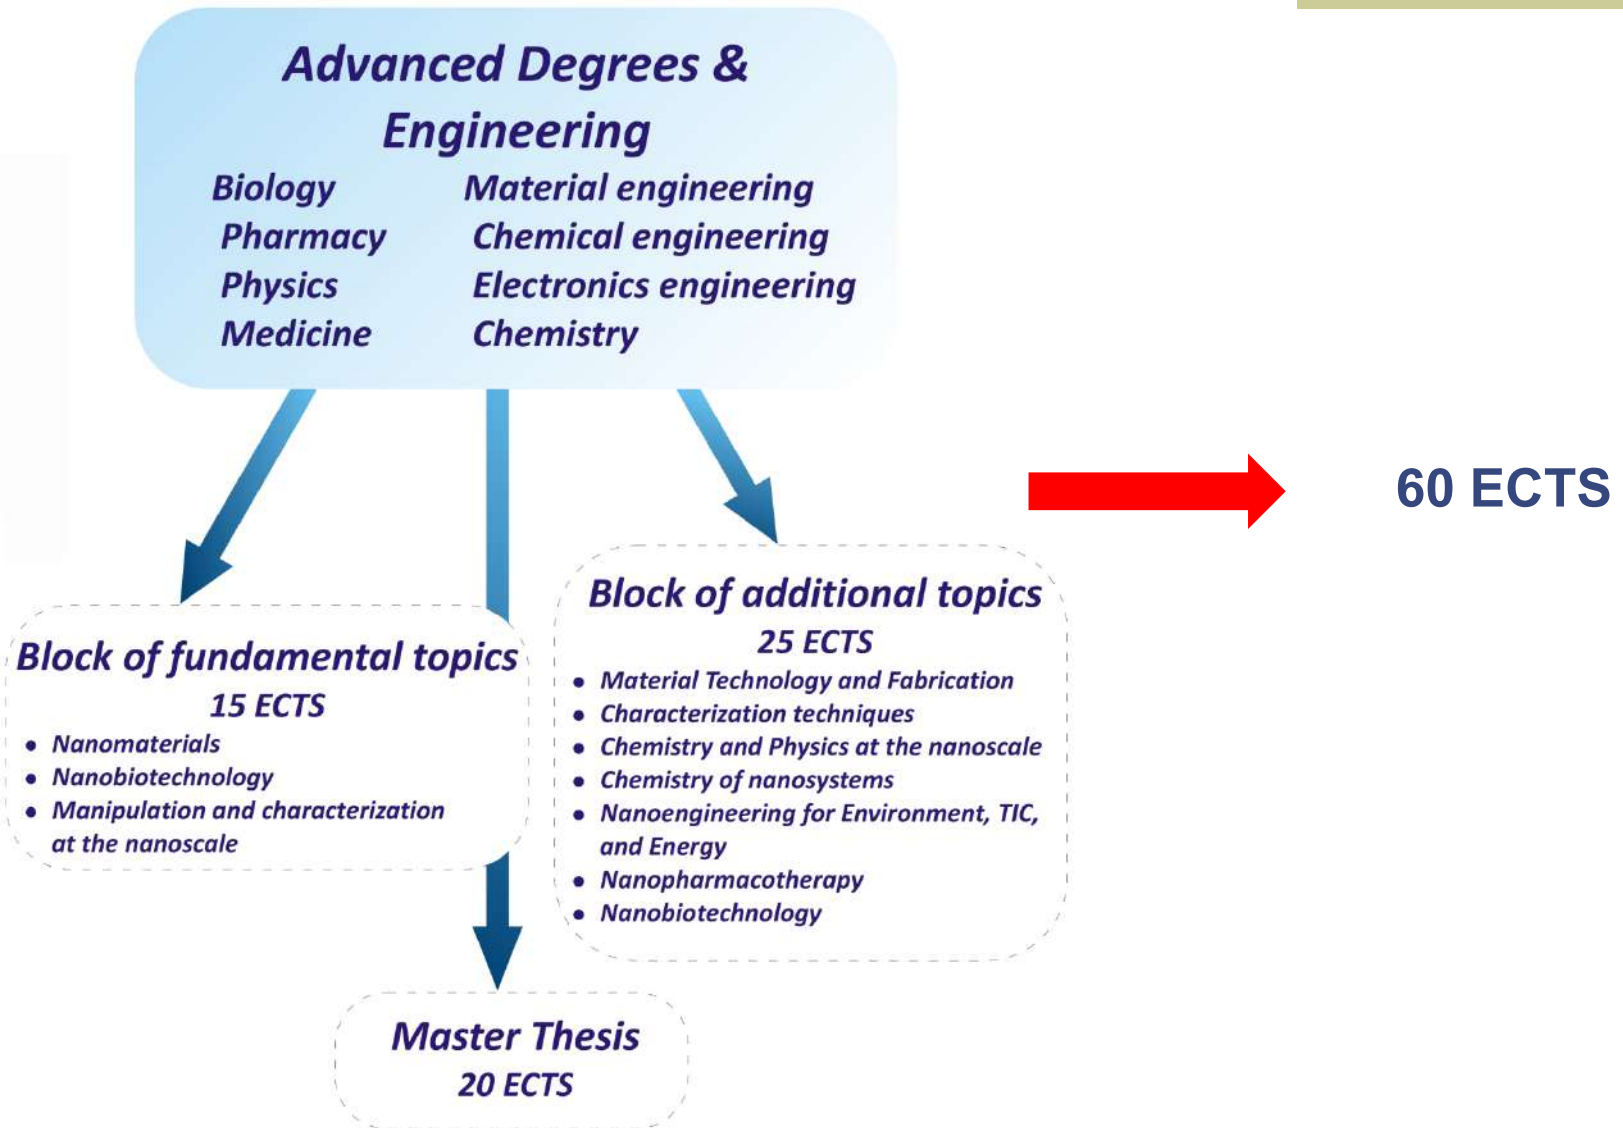

Participation of members from:

- Catalan Institute of Bioengineering (IBEC)
- Catalan Institute of Research in Energy (IREC)
- Barcelona Institute of Microelectronics (IMB-CNM-CSIC)
- Barcelona Institute of Material Science (ICMAB-CSIC)

Master Program

● Fundamentals of Nanotechnology (3×5 ECTS)

- Nanomaterials
- Nanobiotechnology
- Characterization and manipulation at the nanoscale

COURSE MODULES

1. Fabrication and Technology of Nanomaterials
2. Characterisation techniques
3. Chemistry and Physics at the nanoscale
4. Chemistry of Nanosystems
5. Physics and nanoengineering for TIC
6. Nanopharmacotherapy

YEAR 2015-2016		
<i>Fundamentals of Nanotechnology</i>		
Nanomaterials	OB	5
Nanobiotechnology	OB	5
Characterization and manipulation at the nanoscale	OB	5
<i>Fabrication and Technology of Nanomaterials</i>		
Synthesis and processing of nanomaterials	OPT	2.5
Nanomanufacturing and nanoprocessing in clean room environment	OPT	5
<i>Characterization techniques</i>		
Analytical and high resolution Transmission Electron Microscopy	OPT	2.5
Magnetic Techniques: Spectroscopies and Imaging	OPT	2.5
<i>Chemistry and Physics at the nanoscale</i>		
Nanoscale phenomena	OPT	2.5
Surface Analysis and Science	OPT	5
Modelling and simulation	OPT	2.5
<i>Chemistry of Nanosystems</i>		
Nanocatalysis	OPT	2.5
Colloidal systems and supramolecular devices	OPT	5
<i>Nanoengineering for information technologies, energy and environmental</i>		
Nanoelectronics	OPT	2.5
Nanomagnetism and Spintronics	OPT	2.5
Nanosensors	OPT	2.5
Nanophotonics	OPT	2.5
Nanoenergy	OPT	2.5
<i>Nanopharmacotherapy</i>		
Nanosystems for medical diagnosis	OPT	2.5
Bioavailability, efficacy and toxicity. In vitro in vivo evaluation	OPT	2.5
Pharmaceutical Nanotechnology	OPT	2.5
Nanosopic systems for drug delivery	OPT	2.5

Introduction

Pre-enrolment

Nanoscience and nanotechnology are disciplines at the cutting-edge of scientific knowledge. They combine aspects of basic and applied sciences applied to specific fields, such as biotechnology, medicine, chemistry, pharmaceutical sciences, physics, materials engineering, sciences and electronic engineering. Nanoscience and nanotechnology are therefore key areas of interdisciplinary research and development, in which activity is increasing across the globe.

The master's degree in Nanoscience and Nanotechnology at the University of Barcelona is taught in English and intended for students with an academic background in science.

The aim of the master's degree is to provide students with professional competences in the field of nanoscience and nanotechnology, for industry and science. Students must be capable of addressing problems that require interdisciplinary skills. On completion of the master's degree, graduates will be equipped to work on creative tasks in a new scientific or technological environment and form part of interdisciplinary research groups. The compulsory subjects are designed to bolster this interdisciplinarity. The practical component of the optional
