David Roldán

Sales Manager

Solpharma

Technologies S.L.

Containment is not something absolute. The different levels of containment that can be obtained will depend on the system, technical solutions that we apply and the analysis to detect the active product.

On the other hand, to the GMP's aimed at protecting the quality and safety of the product, we add the concept of protecting the worker from the risks of the product itself, making manufacturing a technical challenge.

“Dado el carácter y la finalidad exclusivamente docente y eminentemente ilustrativa de las explicaciones en clase de esta presentación, el autor se acoge al artículo 32 de la Ley de Propiedad Intelectual vigente respecto del uso parcial de obras ajenas como las imágenes, gráficos u otros materiales contenidos en las diferentes diapositivas”.

Have you ever wondered?:

- What opportunities do HPAPIs offer?
- What is the OEL? And OEB?
- What risks are there?
- How to protect workers?
- How is a high containment solution designed?
- How do you know if it is reliable?
